# Atharva Yanna

Pune/India

8766922409 atharvay24@gmail.com LinkedIn GitHub atharvayanna.in

## Education

**Marathwada Mitra Mandals College of Engineering** **2020-2024**
B.E- Computer Science with Honors in Data Science CGPA: 8.84/10.0

**Maharashtra State Board (HSC)** **2020**
12th Grade Percentage: 84%

**Maharashtra State Board (SSC)** **2018**
10th Grade Percentage: 94%

## Work Experience

**Emergys Solutions Pvt. Ltd.** **Aug 2024 - Present:** *Associate Consultant*
Developed a FastAPI backend and LangGraph-based agentic workflow, implementing intent classification, schema/data retrieval, SQL generation, query revision, and model-agnostic LLM selection. Led UI development for the Should Costing module using React.js, Redux, Node.js, Express.js, and MSSQL, implementing modular components, What-If SKU-to-model mapping, and interactive cost-visualization dashboards. Developed a specialized Should Costing module and supplier portal for the chemical industry, integrating web search for real-time supplier discovery, automated data extraction, and LLM-based information enrichment using prompt engineering.

**Mandrake Tech** **Aug 2023 - Oct 2023:** *Software Intern*
Developed a mock Gmail API server in Rust, implementing RESTful API endpoints to simulate Gmail operations and support backend development and testing. Implemented the Google OAuth 2.0 authentication flow, handling authorization, token exchange, and authenticated API access. Applied Rust concepts including ownership, borrowing, error handling, and modular programming to build maintainable backend components. Used GitFlow for version control and collaborative development, following structured branching and code-management practices.

**Persistent System** **Jul 2023 – Aug 2023:** *Martian Intern*
Completed an intensive technical training program covering Linux, RDBMS, and Core Java, building a strong foundation in software development. Gained hands-on experience with Linux administration, including user management, process handling, and file access permissions. Learned relational database concepts and practiced DDL, DML, DCL, and TCL operations using SQL. Developed proficiency in Core Java, focusing on OOP principles, data structures, and exception handling.

**Intel (Summer Program)** **May 2023 – Jul 2023:** *Intel Unnati Summer Intern*
Developed a social distancing detection system to identify whether individuals in public spaces maintained the required safety distance. Utilized YOLOv5 for human detection and implemented distance estimation algorithms using camera resolution, focal length, and pixel distance calculations. Designed and optimized a real-time detection pipeline capable of processing live video streams and flagging distance violations with high accuracy. Gained hands-on experience in computer vision, object detection, OpenCV, and model optimization.

## Projects

**MarkSheet -** *FastAPI, PostgreSQL, Celery, Redis, Supabase*
Developed a backend system for automated student marksheet generation, processing Excel files to generate individual student PDFs and consolidated ZIP archives. Implemented asynchronous background processing using Celery and Redis to handle PDF generation, ZIP creation, and file uploads. Integrated PostgreSQL and Supabase Storage for structured data management and secure file storage, implementing signed URLs for controlled file access.

**Brain Tumor Detection -** *Python, TensorFlow, Keras, CNN, VGG16, Streamlit*
Developed deep learning models for brain tumor detection and classification using MRI images, identifying meningioma, glioma, pituitary tumors, and no-tumor cases. Implemented a custom CNN for multi-class tumor classification and a separate VGG16-based transfer learning model for binary tumor detection. Built an interactive Streamlit application allowing users to upload MRI scans and view predictions from both models.

**Smart Workout Companion -** *React.js, Flask, OpenCV, MediaPipe*
Developed an AI-driven fitness application providing real-time yoga posture monitoring, movement validation, and repetition counting using computer vision. Integrated a React frontend with a Flask backend to process live video streams and provide real-time workout feedback. Incorporated yoga and meditation modules to deliver personalized workout guidance and promote holistic well-being.

## Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, Java, Rust, C++, C, SQL
- **Backend Development:** FastAPI, Flask, Node.js, Express.js, REST APIs, Celery
- **Frontend Development:** React.js, Redux, HTML, CSS, Data visualisation
- **AI, ML:** LangGraph, LLM Integration, Prompt Engineering, TensorFlow, Scikit-learn, OpenCV, MediaPipe, YOLOv5, Hugging face
- **Data Science & Libraries:** Pandas, NumPy, Matplotlib
- **Databases & Storage:** PostgreSQL, MSSQL, Redis, Supabase, MongoDB, MySQL
- **Tools & Technologies:** Docker, Git, GitFlow, Linux, Streamlit, OAuth 2.0

## Certifications

- Microsoft Azure AI Fundamentals
- AWS Academy Graduate – AWS Academy Cloud Architecting
- AWS Academy Graduate – AWS Academy Cloud Foundations

## Research Papers

- **PoseCraft Fitness Navigator:** AI-based system for posture monitoring and yoga pose refinement using MediaPipe and Deep Learning.
- **The Effect of Fake Reviews on E-Commerce and Fake Review Detection**

## Achievements

- Secured 2nd rank in the Project Based Learning Competition, organized by MMCOE.
- Presented peer-reviewed research paper at ICRTACT 2024 (International Conference on Recent Trends & Advancements in Computing Technologies).

## Hobbies

Gym and Exercise, Travelling, Virtual gaming, Sports, Capturing happy moments
